A world of experience...

...from **ics**

Want to reduce your cooling plant power usage and reduce running costs?

ICS are specialists at providing chillers and air conditioning.

Although we can't claim to be able to cool the whole world, we are rather good at supplying the latest state-of-the-art energy efficient chillers to help reduce the energy we draw from it.

Whether you need to reduce your running costs, energy consumption or building's carbon footprint – ICS have a wealth of experience and a proven track record to recommend the most resilient and climate conscious equipment for you or your client.

We have over 450 ECA Government-approved chillers including the latest **Turbocor, Free cooling, 100% heat recovery, Heat pump** and **Class A** equipment.

We also build our own purpose-built chillers here in the UK to specifically meet the needs of our customers who have site-specific requirements.

We analyse, specify and advise – it's as easy as 1,2,3...

We visit, listen and survey

We analyse, specify and advise

We recommend, plan and deliver

ICS have a welcome reputation for supplying quality, high performance and technically supportive products.

We can provide you and your clients with an individual site assessment, backed up with a running cost survey and analysis of your current load conditions.

We then compare this with our latest **Class A** energy-efficient equipment, which includes oil-free inverter driven centrifugal compressors, free-cooling chillers with integral cooling coils and the latest low noise scroll and screw units.

Added to this, there are air and water cooled versions, heat pumps, heat recovery and **chillers capable of being built on site for you** to help in restricted access areas.

Call us now for a site survey by one of our experienced local cooling engineers
