

HVAC Solution for a Security Station

ICS was called when a Dartford based facilities company specialising in the maintenance, repair and installation of Refrigeration and Air Conditioning equipment was tasked with providing air conditioning to a Security Station.

The Project

The secure site was looking to have air conditioning installed to serve the main Security Office, the site required a low noise chiller to suit the sites environment within a limited footprint as space was limited.

ICS Sales Engineer **Owen Hymers** visited the site to assess the application and site access.

Small Footprint

Having assessed the available space and environmental factors Owen recommended 2 off **Taurus Tech 030/SN** chiller unit.

With the added benefit of a small footprint the unit solved all of the site requirements and logistical issues. The further benefits of a stand alone unit is continued running should the sites power fail.

Taurus Tech 030/SN Chiller

The customer was very pleased with the additional site cooling and minimal disruption to the site during the install.

Nationwide Support

ICS offer a nationwide service for all of your process cooling and heating requirements.
