

HVAC Solution for a Solicitors

ICS were called when a large Southern based, Building and Design Contractor was tasked with the replacement of an HVAC R22 chiller at a Solicitors in Southampton.

The Solicitors were looking to improve the buildings HVAC system specifically for energy efficiency, cost and performance benefits. Upgrading to an energy efficient solution also gave the opportunity to upgrade from the now banned R22 refrigerant gas.

EU Regulations

Under EU Ozone regulation EC2037/2000 no new equipment containing R22 can be sold to businesses in the UK and Europe, and by the end of 2014 no recycled R22 can be used by which time all R22 in equipment will become illegal to operate, although it is anticipated that the EU may bring this date forward by up to 3 years.

ICS Sales Engineer **Owen Hymers** visited the customers' site to assess the application and the clients needs.

Site Requirements

Following his site survey, **Owen** recommended the **Aries 195/N** chiller unit, the **Aries 195/N** unit is capable of delivering cost and energy savings providing an efficient solution to the sites requirements.

Aries 195/N Chiller

The **Aries** Range of chillers have a cooling capacity of **162 - 331kW**, designed to provide energy savings in all operating systems, contributing to the protection of the environment.

The installation went smoothly and successfully solved all of the applications logistical issues, improving energy efficiency and meeting current F-Gas regulations with an energy efficient refrigerant.

The customer was very pleased with the additional site cooling and minimal overall disruption to site during the install.

Nationwide Support

ICS offer a nationwide service for all of your process cooling and heating requirements.
