

ICS Industrial Cooling awarded with ISO9001

We are pleased to announce that ICS Industrial Cooling has successfully been awarded ISO 9001:2008. Following a complete assessment of the ICS group of companies and divisions ICS has now secured this globally recognised quality accreditation.

Quality Management

The company's Quality Management System, which was audited by quality specialist ISOQAR, manages all manufacturing, design, installation, sales and service incorporated within ICS Industrial Cooling's business, and was conducted over a 6 day assessment period in August.

Keith Holroyd (pictured below with the ISO accreditation certificate), ICS Group Quality Manager commented "This accreditation is a very positive step forward for ICS as our core business divisions are now recognised for achieving ISO9001 quality standards.

This gives our customers complete peace of mind that we are manufacturing quality products to set standards, which are continually developed to deliver the best products possible with high levels of customer support."

Continual Development

The ISO9001:2008 accreditation is recognised as a starting point for quality as Adam Spolnik, ICS Industrial Cooling Sales Director commented "It is our firm intention to develop our business in tandem with our quality systems and to ensure that we maintain this throughout all areas of our operation.

We want our customers to know that we are continually assessing our business and will be measuring our standards and improvements."

Nationwide Support

ICS Industrial Cooling, who operate throughout the UK and Ireland supply air and water-cooled chillers, air blast coolers, temperature controllers and bespoke solutions.
