

Carbon Trust Chiller Project

ICS Industrial Cooling Saves Leeds Vacuum Formers (LVF) over 32% in Kilowatt Hour Usage In Big Business Refit Upgrade.

£40,000 interest-free loan scheme allows Leeds based LVF to replace energy-guzzling chillers - cost-free.

ICS Industrial Cooling has replaced old, chillers, using an **interest-free loan of £40,000** from the Carbon Trust's Big Business Refit.

Steve Richmond, Works Manager at LVF, said: "The new air-cooled water chiller provided by ICS Industrial Cooling will provide the company with **energy savings of over 32% per kilowatt hour**, which will pay off the Carbon Trust loan within a few years, after that the savings will go straight onto our bottom line. In the economic downturn, it's a real boost to cut energy costs by replacing old equipment, especially as we can channel the significant cash savings elsewhere in the business."

The Energy Saving Chiller On Site

The Big Business Refit

The **Big Business Refit**, an equipment scrappage scheme run by the Carbon Trust, is **offering UK small and medium businesses up to £100,000 in interest-free funding**, to help them scrap their old power-guzzling equipment and replace it with energy saving models that are more efficient and cheaper to run. The loans are designed to pay for themselves through direct energy savings, so once the loans are repaid; savings go straight onto the bottom line.

Hugh Jones, Director, Solutions, the Carbon Trust, said: "LVF's use of a Carbon Trust loan to pay for the installation of ICS Industrial Cooling's energy saving Air-Cooled Water Chiller has created a win, win, win situation. LVF has slashed its energy spend without having to spend company cash upfront on the installation. ICS Industrial Cooling has increased its revenues through the sale. Finally, we at the Carbon Trust are achieving our aim of reducing carbon emissions. We'd urge all other businesses to check their eligibility for the £100m fund available, and to start saving money now."

Fully Installed By ICS

Richard Metcalfe, ICS Industrial Cooling, Regional Sales Director, said: "The Big Business Refit has made more businesses aware of the unnecessary burden that old chillers put on their bottom lines. With unsecured, interest-free funding available to help businesses replace it, there's a growing desire amongst our customers to resist the urge to 'make do and mend' with old, energy guzzling equipment."

Nationwide Support

ICS offer a nationwide service for all of your process cooling and heating requirements.
