

## Plastics Company Cooling

ICS, the UK & European leading supplier of cooling and air conditioning equipment, has successfully provided a cooling package for a large plastics company based in Scotland.

ICS were called in to provide a cooling system when the sites existing system of **3 off TAE chillers running on R22** was unable to meet the increased production on site.

ICS sales engineer, **John Lowe** commented on the installation "We are very pleased with the smooth installation on site. As a customer of ours from over 5 years previous, to have renewed this contract after several years allows this company to benefit from ICS' full range of benefits and high levels of service which come as standard with every ICS installation to ensure total peace of mind".

### Equipment Supplied

ICS supplied **2 NECS 1004** units able to provide cooling at a duty in excess of what was initially required allowing a d d i t i o n a l cooling capacity for further expansion.

### Nationwide Support

### ICS Solution

The main requirements for this project were to provide a chiller system capable of meeting the companies growing requirements whilst keeping the lowering the running costs.

Having assessed their needs ICS were able to provide a **highly efficient cooling solution** that was able to meet all of their requirements. Following a running cost comparison with their existing cooling system ICS were able to offer a solution that gave a saving of **£20,000 on their energy costs per year.**

Energy efficient units can equate to significant cost savings
