

TAEvo now listed on the ETPL

ICS' TAEvo range is now listed on the Energy Technology Product List (ETPL) which means our customers can qualify for Enhanced Capital Allowance (ECA) from the Carbon Trust.

the TAEvo to achieve leading energy efficiency levels ensuring the range is a highly economical long-term proposition.

The Energy Technology Product List

The Governments Energy Technology Product List (ETPL) was created to identify equipment with energy benefits.

When purchasing items from the ETPL you can qualify for an **Enhanced Capital Allowance (ECA)** tax break.

ICS' TAEvo range is now listed on the ETPL which means our customers can qualify for ECAs from the Carbon Trust.

The Enhanced Capital Allowance Scheme

The Governments Enhanced Capital Allowance scheme is run by the Carbon Trust and provides businesses with enhanced tax relief for investments in equipment that meets published energy saving criteria.

The TAEvo

The TAEvo range of chillers is highly energy efficient and across the range can supply cooling from **0.5kW to 176kW**. The TAEvo range offers precise water temperature control providing increased productivity and lower levels of pollution.

The TAEvo range offers the lowest operating costs thanks to the **energy efficient scroll compressors**, the **oversized evaporator** and the **unique evaporator-in-tank configuration**. These factors combined allow

How do you benefit?

If you are looking for a new chiller or cooling package speak to ICS today. We can work out the benefit of upgrading your equipment and confirm the saving for your business.

We can help you to select a chiller from the ETPL, allowing you to take advantage of the ECA tax breaks.

Who qualifies?

- The ECA scheme is open to all businesses that pay UK corporation or income tax regardless of size, sector or location.
- Any new and unused energy saving equipment on the ETPL can qualify for ECA's.
- ECA's are also available for loss making companies.
- End user customers are entitled to claim a proportion of the cost relating to the eligible component.
- Claims can be made for the ETPL equipment, install and transport costs directly related. The claim can also include modifications necessary to accommodate the new equipment.

More Information
